

Hittaut

01 Description

Hittaut is a health and wellness project coordinated by the Swedish Orienteering Federation and organised on a voluntary basis by local orienteering clubs, with support from sponsors and partners. The project has been running for 13 years and has attracted thousands of participants to get out to various places and, with the help of a paper or digital map, look for checkpoints.

At each checkpoint there is a code that you can register via an app, with the chance to win great prizes. Participation is free of charge and everyone can take part according to their own abilities, around the clock during the period 1 April to 31 October 2021.
